

## Positive Pressure Air Tightness Test Device for Self-Rescuer JQZ-4

JQZ-4 mainly used for self-rescuer manufacturers carry out delivery inspection on K-SB series self-rescuers, and end users regularly check positive pressure air tightness of self-rescuer. JQZ-4 adopts high-precision digital pressure gauge, with compact structure, stable performance, high measurement accuracy, visually display pressure values, and also easy to operate.

### Specification

Pressure range	(3~13.73)kPa	
Accuracy Grade	Grade 0.2	
Resolution	1Pa	
Dimensions	(525*420*570)mm	
Weight	53kg	
Digital pressure gauge	Measuring range	(0~20)kPa
	Display	5-bit LCD
	Type of battery	3.6V High power lithium battery
	Life of battery	2 years
Using Conditions	Temperature: (0~40)°C Relative humidity: ≤90%
