

## Filter Self-Rescuer ZL60

### Application

Filter self rescuer ZL60 is a protective device for personal breathing system, the toxic carbon monoxide(CO) in air oxidizes into nontoxic carbon dioxide(CO<sub>2</sub>) through chemical reaction under normal temperature. It applies to the environment where the concentration of oxygen(O<sub>2</sub>) is not less than 18% and carbon monoxide(CO) not more than 1.5%, for the use of rescue teams in the event of an underground emergency.

### Specification

Rated protection time		60min
inhalation temperature		≤60℃ (CO concentration ≤1%)
Maximum CO protection concentration		<1.5%
Outside dimension		94×73×143mm
Weight		≤1kg
Period of validity	In carrying	3 years
	In storage	5 years
