

JMZ-1 Coal Storage Yard Intelligent Monitoring System

- Meet the requirements of national standard, environmental standard and DB61/1078-2007.
- Real-time monitoring of dust concentration, temperature, CO concentration and smoke etc.
- AI industrial video surveillance, linkage alarm, highlighting alarm screen.
- Over-limit sound and light alarm, intelligent linkage spray dust suppression.
- Wired and wireless combination, adaptive to multiple sensor interfaces.
- Manual/automatic switching, can switch to manual status at any time.
- Modular design, flexible configuration according to user needs, function extension.
- Monitoring data can be uploaded to the higher authorities in real time.
